Home values went up for 76 out of the 83 years between 1942 and 2024 — meaning real estate has a 90%+ win rate!

	1980	1981	1982	1983	1984	1985	1986	1987	1988	1989
appreciation	7%	5%	1%	5%	5%	7%	10%	8%	7%	4%
interest rate	13.74%	16.63%	16.04%	13.24%	13.88%	12.43%	10.19%	10.21%	10.34%	10.32%
		October 18.63%								

The 1980's had the highest rate in over eight decades, yet home prices appreciated more than 6 of the last 7 decades.

## 2025 Market Talking Points

#### "I'm waiting for prices to go down."

- 2025 West Michigan home price projections from Business Insider, National Mortgage News, & Next Michigan News range from 5-7.2% appreciation.
- For example, at 6%, a \$300,000 home will cost you \$318,000 after waiting one year, \$337,000 after 2 years, and \$357,000 after 3 years.
- Your new home is running away from you at over \$1500 a month, every month you wait!

#### "I'm waiting for interest rates to go down."

- · Decreasing rates lead to increased prices.
- Lower rates = more buyers and competition.
- A 1% rate drop will normally increase the price of the home by 5%.

#### "I'm just going to rent." (Translation: "I'm scared.")

- It's not scary if your lender offers customized solutions.
- The average net worth of a renter is \$10,400. The average net worth of a homeowner is \$396,200; start building your wealth!
- 100% of rent is a fee.
- · Low to no money down options.

#### "I'm waiting for a market crash."

- Unlike 2008-2012, loan and appraisal guidelines are strict.
- More buyers than homes = increased competition.
  Inventory is improving but still low.
- Inventory won't start to balance out in this decade.

Home prices rarely drop. The 1980's had the highest interest rate in eight decades but saw the third best appreciation rate. (See back page)
